

Age Calculator v2.0

Age Calculator is an application used to calculate the age between two dates. The age is displayed in several ways

Section 1 displays age in the combination of Years, Months and Days.

Section 2 displays age in total number of Years, Months and Days.

The screenshot shows the 'Age Calculator v2.0' application window. At the top, there is a title bar with the text 'Age Calculator v2.0' and standard window control buttons (minimize, maximize, close). Below the title bar is a 'Help' button. The main content area is titled 'Select date range' and contains two date pickers: 'From: 12/22/1969' and 'Through: 4/21/2008'. Below the date pickers, there are two sections. The first section, 'Age in Years, Month and Days', is circled in red and labeled 'Section 1'. It contains three input fields for 'Years:', 'Months:', and 'Days:', followed by a larger empty input field. The second section, 'Age by total Year, Month, and Days', is also circled in red and labeled 'Section 2'. It contains three stacked input fields for 'Years:', 'Months:', and 'Days:'.

Installation

The application is a stand-alone executable. No additional files are created and no registry items are created or altered by this application.

Removal

The application is a stand-alone executable; therefore, removing the application can be performed by deleting the executable. Note: Any shortcuts to the application created by the user must be deleted by the user.
